e3 introduces the innovative BIG DATA EUROPE SIM delivering the cheapest 4G data, unlimited usage and coverage in 40+ countries.

Palma de Mallorca – 8th March, 2018: Palma-based e3 Systems, the global superyacht communications provider today announced the immediate availability of the BIG DATA EUROPE SIM.

Created especially to meet the ever-changing needs of guests, crew and all onboard, this groundbreaking 4G data SIM is a first for the superyacht sector. Amongst its multiple benefits, BIG DATA EUROPE offers the cheapest data on the market across virtually the whole of Europe - with rates as low as €2.5/GB.

"When our customers tell us what they want, we listen, which is why flexibility and convenience, as well as pricing, lie at the heart of our new game-changing SIM," explains Ana Espallardo, Airtime and Contract Services manager at e3. "It's a unique product in that it doesn't tie the user down with monthly commitments and they simply pay for what they use This SIM removes the need to plan ahead and we believe it will also take away a lot of the issues associated with using data at sea and when in port."

BIG DATA EUROPE offers data on a tiered scale which in practice means that the more data a customer uses, the less they will pay per gigabyte. Other benefits include no limit on usage, so customers have no need to request upgrades or downgrades. There's no monthly commitments in terms of

minimum cost or usage. While the card delivers peace of mind by offering automatic blocking outside of valid territories and easy online usage checking.
